EXAMINER

LAVINDER, JACK W

ART UNIT	PAPER NUMBER
----------	--------------

3677

DATE MAILED: 05/27/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	10/646,005	GREENSIDE ET AL.	
	Examiner	Art Unit	
	Jack W. Lavinder	3677	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 March 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-18 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-18 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-13, 15-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Fletcher, 5293303.

3. Regarding claims 1-3, 5-8, 10, 11, 12, 16 and 17, Fletcher discloses

- A first member (8) having a slot (9) operable to be attached to a chassis
- A second member having a lip (36, 41, 43, figure 4) and a hole (hole in dotted line configuration just below numeral 32 in figure 4), which is operable to receive a screw (see screw head just below bracket element, 13, figures 3 and 4) and to attach the second member to the side (16) of the sub-assembly (14)
- A latch guide (right side of element 33), which contacts and surrounds a guide member (32) to prevent over-rotation when the sub-assembly is not engaged with the chassis
- A latch guide that also contacts the slot edge in the first member via the lip (36, 41, 42, figure 5) to prevent over-rotation

Art Unit: 3677

- A first and second electrical connectors, one on the sub-assembly and the other on the chassis (12, col. 3, last paragraph and col. 4, first few lines)

Regarding claim 9, Fletcher discloses a screw for rotatably attaching the second member to the sub-assembly, i.e., the screw, when loose, allows for the rotatable adjustment of the second member relative to the first member in order to achieve the proper alignment between the members so that the latch functions properly.

Regarding claim 13, Fletcher discloses a screw, which attaches the second member (32,33) to the side (16) of the sub-assembly. This screw forces the first connector (8) to mate with the second connector (32,33) when the screw is tightened. This is achieved by rotatably adjusting the second connector in order for it to be in proper alignment with the first connector (5, 8) and then tightening the screw so that it forces the lip (36, 41, 42) to engage the slot (9) when the second connector is rotated in the clockwise direction.

Regarding claim 15, the sub-assembly has a stop at the rear of the sub-assembly to maintain a minimum distance between the rear of the receptacle (5) and the sub-assembly (11). The stop is the outer housing of the electrical connector (12).

Regarding claim 18, Fletcher discloses the method step of tightening a screw (38) that attaches the first latch member (33) to the sub-assembly (32) after engaging the lip with the slot (col. 4, lines 62-66).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 14 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fletcher in view of Frank, Jr., 6297955.

6. Fletcher fails to specifically show a stop disposed on the receptacle. Frank, Jr. discloses the use of an elastic stop (288, col. 10, lines 52-55, figure 7) on the rear end of the receptacle

“for reducing a shock force when the cavity fully receives the module and when the module connector engages the host connector”

It would have been obvious to a person having ordinary skill in the art at the time the invention was made to put an elastic stop in Fletcher's device, as taught by Frank, Jr., for reducing a shock force on the module and receptacle in order to prevent failures and to increase the useful life of the device.

Claim Objections

7. Claims 1-7 are objected to because of the following informalities: the preamble of the claim is not consistent with the body of the claim. The preamble is directed to a latch and the body of the claim is directed to a chassis, a latch and a subassembly. Appropriate correction is required.

Response to Arguments

8. Applicant's arguments filed 3/17/05 have been fully considered but they are not persuasive. The applicant has amended the claims to include the limitation that the second connector is operable to rotate about an axis normal to the side.

The applicant argues, on page 6, first paragraph, that the lever in Fletcher does not rotate about an axis normal to the front plate. This argument is not directed to the claimed limitation that the second member (the lever) is operable to rotate about an axis normal to the side. The claim never states that the axis is normal to the front plate.

Fletcher discloses a second member (lever, 31) attached to a side (17) via pins (19), plates and a bolt (figure 3), wherein the second member is rotatable about an axis (34) normal to the side (17). Therefore, Fletcher meets and discloses the newly claimed limitations.

Conclusion

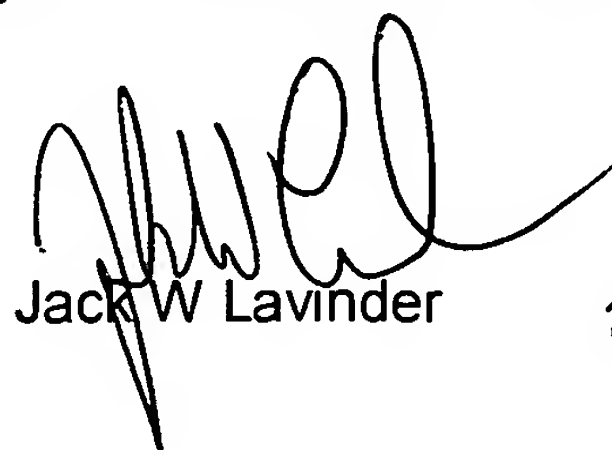

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack W. Lavinder whose telephone number is 571-272-7119. The examiner can normally be reached on Mon-Friday, 9-4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Swann can be reached on 571-272-7075. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
